

# Chichani Group

Reliable Steel for Every Need

# About Company

## **Chichani Tradelink Pvt. Ltd.**

With over 50 years of experience, **Chichani Tradelink Pvt. Ltd.** is a trusted steel supplier and developer, collaborating with industry giants like Tata Steel, JSW Steel, Shyam Metaliks, and Kamdhenu Structures. Our legacy is rooted in quality, reliability, and customer satisfaction. Specializing in durable and efficient steel solutions, we bring decades of expertise, innovation, and precision to every project. Our commitment to excellence and timely delivery has made us a preferred partner in India's infrastructure and construction sectors.

## **Primex Supply LLP**

With a strong focus on delivering high-quality products and services, **Primex Supply LLP** excels in providing comprehensive supply chain solutions across multiple industries. We partner with leading manufacturers and suppliers to offer a wide range of industrial products. Known for our dedication to customer satisfaction, we combine technical expertise with timely delivery to meet the diverse needs of our clients in sectors like construction, manufacturing, and infrastructure. Our mission is to bring value through consistent product quality, competitive pricing, and seamless service.

# Board of Directors

## **H. B. Chichani**

Chairman

With over 50 years of leadership in the steel industry, he has built Tradelink into a trusted name. His vision continues to guide the company toward innovation and growth.

## **Krishna H. Chichani**

Managing Director

Driving modern strategies with a focus on efficiency and expansion, he ensures Tradelink stays ahead in a competitive market while upholding family values.

# Why Choose Us?

Partnering with us means gaining access to high-quality steel products sourced from trusted manufacturers, backed by over 50 years of expertise. Our streamlined supply chain ensures timely delivery and competitive pricing that adds value to your projects. We prioritize customer satisfaction through personalized service, technical support, and innovative steel solutions tailored to your specific needs. Trust, reliability, and industry knowledge make us your preferred partner in building strong, lasting structures.

## OUR MISSION

To deliver superior-quality steel products and innovative structural solutions with a commitment to customer satisfaction, and timely service, while fostering strong partnerships with industry leaders.

## OUR VISION

To be India's most trusted and preferred steel solutions provider, setting benchmarks in quality, sustainability, and innovation for infrastructure and construction development.

# Brands

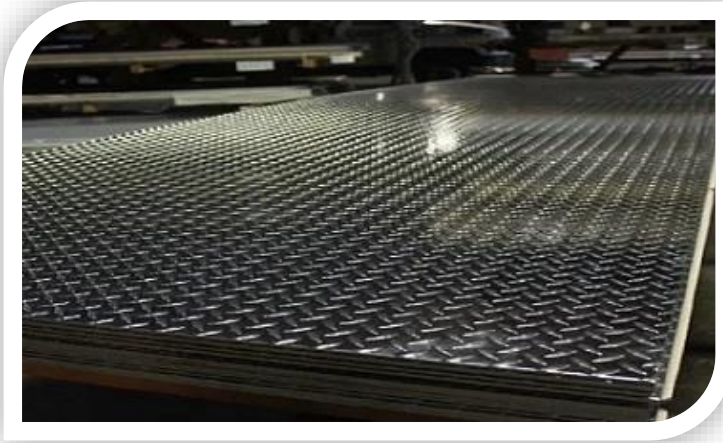

# Our Products

## TMT

Thermo Mechanically Treated (TMT) bars are one of the most essential construction materials used in modern civil engineering projects. Known for their high tensile strength, flexibility, and resistance to corrosion, TMT bars provide the necessary reinforcement for concrete.

## HR Coils & Sheets

Hot-rolled (HR) coils & sheets are steel sheets made by rolling steel while it's glowing hot. This makes them easy to shape and bend. They cost less than cold-rolled steel, have good strength and weld easily.

## CR Coil & Sheets

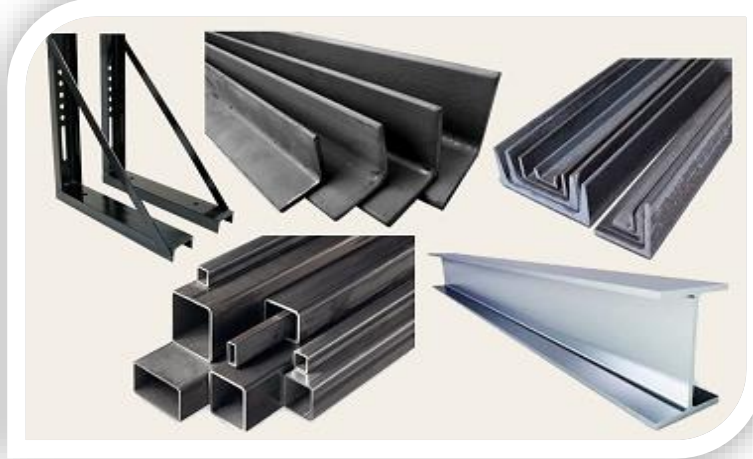

Cold-rolled (CR) coils & sheets are steel products made by first hot rolling and then further processing the steel at room temperature. This extra step gives a smooth, clean surface; exact thickness; and tighter size control.

### **Dowel Bar / Round Bar**

Dowel bars and round bars play a critical role in civil construction and mechanical engineering applications. Dowel bars are short steel bars used to provide a mechanical connection between slabs

### **Structural Steels**

Structural steel refers to a category of steel specifically designed to be used in construction frameworks and heavy-duty applications. It comes in various shapes such as angles, beams, channels, tees, and hollow sections.

### **Narrow Beams & Columns**

These structural elements are engineered to provide maximum strength while occupying minimal space, perfectly suited for the demands of modern construction and architectural design.

### **PPGI /GI /GC Sheets & GP Coils & Sheets**

Galvanized Plain (GP) coils and sheets are made by coating steel with a protective layer of zinc through a continuous hot-dip process. .

### **DI Pipe**

DI Pipe (Ductile Iron Pipe) is a robust and durable pipe made from ductile cast iron, which combines the strength of steel with the corrosion resistance of cast iron. It is widely used for water supply
